ACTUAL LETTERS FROM CUSTOMERS WHO USE 'LIVE' ANTIOXIDANT ENZYME PRODUCTS FROM BIOTEC FOODS

ARTHRITIS - SHOULDER TENDONITIS

Nine months ago I developed a severe pain in my right shoulder. I could not sleep because of the pain and the throbbing during the night. It was impossible to raise my arm. It felt stiff and it pained me when I tried to lift it. The doctor said it was 'tendonitis'. He gave me some medications, which I had a reaction to and had to stop taking.

I then went to the health store and was told to try 'Cell Guard'. I took them according to directions on the bottle. Within 24 hrs. I felt some relief from my pain and by the third day the pain was almost completely gone. I continue to take them every morning and feel great. I have two other relatives who now take them and say it has helped their arthritis.

Helen Medina - Stockton, CA

RHEUMATOID ARTHRITIS

My wife Estella began to suffer pain in her right knee in May of 1976. Finally, I sent her to an orthopedist who made a diagnosis, put her in a knee brace and she left on a 'two weeks' vacation. When she returned, she could not straighten her leg and an operation was required to keep her from being crippled. She had a mis-diagnosis with the operation, but she actually had a case of Rheumatoid Arthritis. Hard work and nine Ascriptan per day enabled her to walk again, but she was never without pain.

At the time I was introduced to Biotech's 'Cell Guard' on June 16, 1983, both her knees were inflamed and swollen to the extent that the slightest pressure brought tears to her eyes. Because of the severity, I immediately put my wife on six tablets per day for twenty-one days and then three tablets per day thereafter. Although she saw no improvement, she took them faithfully; and after a four-month period, she suddenly realized the inflammation and tenderness was disappearing from her knees. She continued on the three per day regimen for two years.

In 1985-86 winter bowling season, my wife bowled weekly in five leagues and plays golf and does all her own house and yard work. She goes for months with little of no pain. She is on a maintenance dosage of two tablets per day and when an occasional flare-up occurs, she returns to the six per day until it is brought under control.

'Cell Guard' been a God-send to our family. The above is not a testimonial - It is the truth! How often I had bumped my wife's knees accidentally and brought tears to her eyes. This no longer happens. She has some bad times on occasion but never like in the past, and more often is pain free.

Personally I don't want anyone to take Biotech's antioxidant products unless they will take it for a four-month period. (This doesn't always happen.) Anyone who has arthritis will be looking for help the rest of their lives, and I feel if they quit before giving your products a chance, they may be missing out for the rest of their lives.

Dr. Donald Marquette, D.C. - Holly Hill, FL.

CHEMOTHERAPY & BREAST CANCER

Two years ago, I was completing a 6-month course of chemotherapy as a follow-up treatment for breast cancer surgery, and I was facing two and-a-half months of radiation therapy. While I had done well during the chemotherapy, I was able to work without interruption and felt reasonably good during that period. I was not looking forward to the exhaustion and further damage to my body that I had been told the radiation would bring.

Since I am a college instructor, the radiation treatments were coming at the worst possible time: the second half of the semester was nearly upon us, with the attendant final exams and other pressures and, of course, the holidays were approaching.

My youngest daughter, Michele, was working part-time at a local drugstore, and she mentioned my upcoming radiation treatments to the pharmacist. He handed her a bottle of 'Cell Guard' and said, "Tell you mom to try this. It will help to counteract some of the ill effects of the radiation." Good daughter that she was, Michele brought home the bottle along with some literature from the company that manufactures 'Cell Guard', and said, "Well, Mom, it can't hurt."

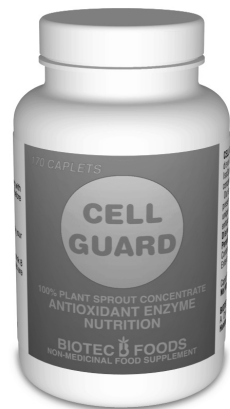

It didn't hurt! Actually, I sailed through the radiation treatments with no fatigue, and I worked through the end of the semester without missing a day of school even though I had added to my schedule the daily trips to the hospital for my treatments. In fact, the last two weeks of radiation (the "booster" phase) had to be done at a distant hospital, in San Jose, about seventy-five miles from my home. But I had no difficulty finding the energy to add those trips to my already crowded schedule; indeed, I used the trips to do a fair amount of Christmas shopping. The treatments ended shortly before Christmas and shortly after the close of school. I added my aerobics classes back into my schedule (something had had to give!), and enjoyed a perfectly lovely Christmas holiday.

I am convinced that it was the 'Cell Guard' that made the difference in how my body responded to the radiation treatments. And I must say that I delighted in confounding the medical personnel who were treating me, as they watched in vain for my energy to flap and for significant damage to my skin. Nothing happened.

I continue to take 'Cell Guard', and (now that I can focus on other issues) I have noticed that the arthritic joint pain and constant allergic rhinitis I used to suffer have disappeared. In addition, while I have watched my students and colleagues succumb to various cold and flu epidemics, I have not had so much as a sniffle since beginning the 'Cell Guard'.

I am very grateful for 'Cell Guard'; it helped me through a very difficult time, it helped me to recover quickly, and it is helping me to stay well.

Maureen Girard - Carmel, CA 93923

TOXIC POISONING - AGENT ORANGE

This is a long overdue letter regarding the phenomenal success that I have experience using your antioxidant enzymes.

Several years ago I was diagnosed as suffering from peripheral neuropathy due to my exposure to 'Agent Orange' while serving in Viet Nam. My feet and legs and hips were numb at times. I was simultaneously suffering chronic and severe pain in my knees, lower and upper back and the area just below the shoulders.

The Veterans Hopsital was not able to diagnose or treat the pain successfully over a ten year period. Unable to walk upstairs and sleep in my own bedroom, I had to convert my apartment for handicapped living on the ground floor and was eventually confined there. I could not walk without a cane. Let me assure you "Life was very painful and depressing."

A friend of mine told me about your enzyme products and of the good results he had experienced. So, I ordered a bottle of your Cell Guard antioxidant enzymes.

Within five (5) days most of pain simply went away. I was amazed and happy to say the least. And, though New York had some terrible winter conditions, I joyfully enjoyed being able to shovel snow from my front walk.

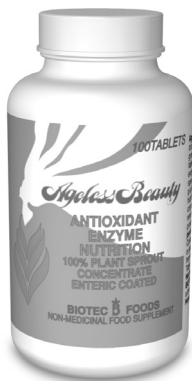

I hope that people will have an open mind about your products. I feel confident that they can and will help most people.

Again, thanks for a 'Great Product' and feel free to call me about he benefits that I have experienced from your product

Fred Blasetti Viet Nam Vet - Greenville, NY.

The stories appearing on these pages are actual letters recieved from the customers who use the antioxidant enzyme products from Biotech Foods. We hope that if you choose to use our products, you will have similar results and write to us with your story.

Ageless Beauty

DRY SKIN

Thank you for making the 'Ageless Beauty' enzymes! Where I live the water is extremely hard. After every shower I have to rub lotions into my skin or the water leaves a film of mineral deposits. I also have always had dry skin especially on my arms and legs. For this reason have always used lotions even when showering in soft water!

I have been taking 'Ageless Beauty' for 2 months now and my skin has dramatically changed! Not only is it no longer dry, but my skin is so soft now too. I will continue to take 3 tablets a day forever if you will continue to make them!

Mary De Neffe - Ashland, Oregon 97520

AGE SPOTS - STRETCH MARKS

This is to let you know how wonderful I think your enzyme product 'Ageless Beauty' is! I have been taking this product steadily now for over four months, taking three daily with plenty of fresh water.

At first, it seemed not much was going to happen, and then after the first month, I then started noticing that the over-porous (skin) texture and imbalances between oily and dry areas were beginning to get more refined and balanced.

After two months, and much to my surprise, I started noticing that many of my moles, even those my doctor had told me were 'pre-cancerous' and would eventually need to be surgically removed, were beginning to shrink, and lose their dark pigmentation. The dark spots that some people call 'liver spots' or 'age spots' were also beginning to disappear!

I am a competitive woman, and have been a body-builder and trainer for five years, which I stopped due to a severe knee injury. Once I stopped my heavy weight training regimen, I was faced with trying to whittle my body size back down to 'normal', which left me with a lot of stretch marks. Now, that I'm thirty years old, I just accepted the fact that my body was losing its resiliency, and would never be able to fully 'snap back'. However, I am glad to say that since I've been on 'Ageless Beauty', those stretch marks are beginning to shrink and disappear also.

Also, I was forced to over-sun myself to get the dark tan needed to compete in bodybuilding contests. This added to the amount of brown spots and wrinkles I had gotten. But, now those too are also going away.

I feel that everyone involved with sports such as bodybuilding should know about your products, as they all face these skin problems. In addition, I would like to add that the enzymes have helped considerably in regaining the flexibility and lessening the pain in my old knee injury. I am able to walk five miles a day with no pain or swelling afterwards. In fact, My knee hasn't felt this good in years!

Andrea Miller, MT - Scotts Valley, CA 95066

AGE SPOTS

I took 'Ageless Beauty' in accordance with your label recommendations and found the product to be truly effective. I had 2 to 3 small brown spots or blotches on my forehead which I received from too much sun 3 years ago.

Whenever I lay in the Sun they became more prominent, so I stopped doing so. And, although they never got any worse; they never went away.

I'm no doctor but I was afraid of skin cancer. After taking 'Ageless Beauty' everyday for two (2) weeks with a dosage of 6 tablets of each morning on an empty stomach my spots have completely disappeared. It is truly dramatic!

I am extremely impressed with the effectiveness of 'Ageless Beauty' and although, no claims were made on the bottle, it never the less lived up to all my expectations. I feel Biotec has a truly fine product on its hands that WORKS! I'm a satisfied customer.

William E. Gavin - San Francisco

Anti-Stress Enzymes

ARTHRITIS

I have suffered from arthritis for many years. I have artificial joints in both hips, which indicates how severe my condition has become. Winters are particularly hard for me because of the cold, damp weather and because it's difficult to get exercise. I dread winters.

This winter my daughter-in-law gave me a bottle of 'Anti-Stress Enzymes' with the instructions for use which she purchased at Vitamin Junction, Inc. in Hurst, Texas. After following the instructions and using the first bottle, I have felt significantly better even during the worst of winter.

I'm not much for taking pills but your product really works and I will continue to use it. Thanks for coming up with something to help folks like me.

Clarence T. Rehagen - Rogers, Arkansas 72756

GILBERT'S SYNDROME

I wanted to write and share with you the success that I have had with the 'Anti-Stress Enzymes'. I have an inherited genetic disorder called Gilbert's Syndrome. It is a condition of the liver where an abundance of Bilirubin, (poison) is emitted into the bloodstream.

With age, my resistance has decreased and energy levels subsided greatly. From talking to physicians and searching medical texts I had found NO KNOWN cure.

My condition was compounded by a serious bout with hepatitis I contracted in 1981. I had been constantly fatigued since then. One year ago I tried the enzymes. I started with 6 per day for the first two weeks. I felt a remarkable improvement in stamina and abundance of energy. I have taken three to six tablets a day regularly and maintained a good level of vitality since then. I have not found anything close to the results I have had with the 'Anti-Stress Enzymes'!

Julian Boswell - Huntington Beach CA, 92647

MULTIPLE SCLEROSIS

Just a short note to thank you for working with me all these months and to tell you the difference the 'Anti-Stress Enzymes' have made in hopes of helping someone else. I can't tell you how many months I have been on them, only that you had just started carrying them.

I was diagnosed as having MS in July of 1985. The symptoms were originally limited to my right hand and right side of face but soon progressed to involve the right leg. Fatigue and weakness were what proved to be the most difficult symptoms to endure. I had to drag my right leg when I did move around and my right hand was useless with spasms and weakness. This made living alone quite a challenge but I refused to give up and go home even when the tonic spasms started. The spasms lasted about three months and the medication the neurologist put me on to stop them caused 'great fatigue' and 'hair loss'. I am grateful, however, that they are less frequent.

When I began taking 'Anti-Stress Enzymes' and had completed the initial bottle I had more energy in spite of the 'Lioresal' used for the tonic spasms. I was able to lift my leg in walking without having to drag it. I regained strength in my right hand and could now cut vegetables and use scissors albeit not too well.

I quit taking the enzymes as I remember because I was tired of all the vitamins. I was taking mega-doses and was sure that the improvement in my condition would have occurred anyway. It took for five days of extreme fatigue, weakness, and inability to lift my stiff right leg and also depression before I caught on. The only thing different I was doing was NOT taking the 'Anti-Stress Enzymes'!

Some of us are slower getting the point. Within one week of resuming the enzymes, I was myself again. I have NO idea of why these are helping me. I know they absorb extra "free radicals" that the bodies enzymes are overwhelmed to do. I know from reading "The Yeast Connection" that a theory of cause in MS is a depressed, overwhelmed immune system. I don't know why they work for me, yet I know I don't function well without them.

Thanks again I hope we're able to help someone else.

Bonnie Overton

If I had to stop taking all of my supplements yours would be the last to go.

INJURED JOGGER'S KNEE

I wanted to thank you for your producing an excellent product. I started taking 'Anti-Stress Enzymes' in March of 86. I had injured a knee jogging and an ankle in a ladder accident. I started taking 6 tablets a day for the first two weeks and within three days needed two hours less sleep at night. After the first two weeks I cut down to three tablets a day for a month and have been taking two tablets a day ever since.

Within two months I had no more swelling, stiffness and pain in my knee or ankle. And, that is, even though I stand on it for 5 or 6 hours straight before I get a break at my job. If I had to stop taking all of my supplements yours would be the last to go. You are working for an excellent purpose, thank you for doing what you are.

Rich Lake - Iowa City, IA 52240

RHEUMATOID ARTHRITIS

Just wanted to let you know how delighted I am with the 'Enzymes'. I have had a severe case of Rheumatoid Arthritis for 20 years. I was always in pain and too exhausted to do anything. I started taking your 'Anti-Stress Enzymes'. They've done so much good for me. I could hardly believe that there was almost no pain and my energy is so good that I have been able to do lots of things that I had not been able to do in years.

Mrs. C.F. Mullins - Garland, TX 75040

ANTI-STRESS ENZYMES - ENERGY & GOUT

I started taking 'Anti-Stress Enzymes' and now I feel great. I don't feel any of the tiredness which is usual in a guy 65 years old. Not only that, I am a long time sufferer of Gout, which attack my joints on the feet from time to time with swelling and excruciating pain. Adding 'Runner Edge' to my daily intake of 'Anti-Stress Enzymes' and the two together have dramatically improved my condition and well being.

Alberto A. Llacay - Houston, TX

RHEUMATOID ARTHRITIS

I work at Nutrition World in Green Bay, WI. and have been using your product 'Anti-Stress Enzymes' for Rheumatoid Arthritis. At first I used 3 bottles during which time I noticed no improvement. However, because of expenses, after the initial period of 6 tablets a day for the first two weeks, I had used only one a day (2 below your recommended maintenance dosage).

After a lapse of about three months I started using your product again. This time I was following instructions explicitly. I am still taking three per day and feel that it has helped relieve the stiffness to some extent. You can be sure I'll be telling my Arthritic customers about your product.

Ann Delwiche - Green Bay, WI

ARTHRITIS & KIDNEY PROBLEMS

I am a 68 year old man with arthritis and kidney failure. These conditions cause pain and fatigue. I have taken food supplements for years and taken all kinds that were supposed to help the arthritic pain.

When I visited a health food store in July I noticed a new product called 'Anti-Stress Enzymes'. I purchased two large bottles and started the dosage according to directions. In two weeks I noticed a difference. I had less pain and had more energy than I'd had known for years.

My check up at the Doctor showed an improvement in the kidney condition. (*this was caused by taking medicine for arthritis*).

When I had finished taking the two bottles, I didn't purchase. In a short time I begin to feel 'down and out' with 'no energy' and the arthritis was bothering me more than when I took your 'Anti-Stress Enzymes'. I have purchased two more bottles and again am feeling better. I can work around home all day without lying down to rest for lack of energy.

I have to drive 100 miles to get 'Anti-Stress Enzymes', however, the results I get from them makes

it worth it. I think this product should be on the shelves at all food stores.

John E. Weathers, Indiana

TOXIC POISONING

In July 1984 an auto accident fractured my ribs and deflated my lungs. Because of my knowledge as a nutritionist, herbologist and massage therapist, I knew my metabolism; immune system and lymphatic system were not functioning right. Also because of previous toxic poisoning caused by inhalation of gasoline my lungs are very susceptible to smoke, chemicals, and various types of pollution.

I began taking your 'Extra Energy Enzymes' and noticed a gradual improvement but I was still not quite right. I was having some skin rashes (due to my kidneys) as I started taking 'Ageless Beauty' along with the 'Extra Energy Enzymes'.

I was working during this time in the Gainesville, Florida area with clients. I noticed that they all seemed to be suffering from similar illnesses and all of varying ages. Upon investigating I found that Gainesville, Northern and Western Florida are highly polluted areas along with So. Carolina and So. Georgia. These are possibly one of the most polluted areas in the U.S.

I recently heard to double the dosage for extreme conditions, so I did. I felt an immediate reaction and feel better than I did before my accident. I still have reactions from the pollution here but mine are mild compared to its effect on others. My energy level is higher.

Heather Glenn - Gainesville FL

KNEE PAIN

For the last four months have been taking 'Extra Energy Enzymes'. I just have to tell you how very pleased I am with this product. Before taking it I was experiencing pains in my left knee if I stayed in one position to long and now I have no pain at all. I just want to thank you. I love this product and will continue taking it daily. And, I have told my friends about it.

Jeanette Murrell -Oakland, CA 94618

INCREASED ENERGY

My husband and I started taking 'Extra Energy Enzymes' approximately three months ago and they are wonderful. We have more energy with no nervous side effects. We are both in our middle 40's but feel like we are 25, thanks to your product. We buy your product from Vitamin Junction in Hurst, TX. They are the people that recommended 'Extra Energy Enzymes' to us.

Mike & Dedi Pringle - Colleyville, TX 76034

FATIGUE

I am writing this letter to you because I would like to express how wonderful your 'Extra Energy Enzymes' have made me feel.

Your product was recommended to me by a friend. I had explained how much fatigue I have had and how I was unable to go for a nice long run after work. I have to admit I was a bit skeptical about trying your product because I have tried many different products, but what sold me was the salesperson telling me about your 'Customer Satisfaction Guarantee'. It really made feel that Biotec Foods is confident about it's products.

Since using the 'Enzymes' I feel great. I am thinking more clearly. I enjoy my runs after work. I have so much more energy and a better attitude towards life.

Martha T. Toeple

PERFORMANCE ENERGY

As a member of "Kool and the Gang", I have traveled extensively throughout the world. With the aid of the Biotec Extra Energy Enzymes my energy level has increased, while my toxin level has decreased during the usage of this product. It has also decreased my jet

lag considerably.

My job with "Kool and the Gang" requires a lot of physical energy because of the choreography, playing the trombone, and singing. By taking this product for several months, I've noted a definite improvement of overall energy.

Clifford Adams - Kool & the Gang

INJURED ANKLE

I would like to let you know of my success concerning your product 'Extra Energy Enzymes'. Last year on a hiking trip with a friend, I fell down a steep slope and injured my ankle. Although it wasn't broken, I could barely walk out of the park. After a few months my ankle healed but continued to become inflamed after exercising and work where I stand all day long.

I tried your product one year after my injury and within the first week of use, discovered more flexibility, no swelling or pain. I also had the additional benefit of more sustained energy. Now I can exercise free of pain and run an extra mile as well.

Theresa Valerga

MORE ENERGY

I must say I'm skeptical when I comes to vitamins, health cures and magic diets. So when a friend told me about her success with your product 'Extra Energy Enzymes', I didn't believe her. But, having known her for years, I had to admit that she DID have more energy and was sleeping less since she started taking your product.

So I bought my first bottle of 'Extra Energy Enzymes' pills and two weeks later I wasn't falling asleep at my work desk at three in the afternoon. And, my workouts at Nautilus after work were easier since I wasn't feeling so tired. Beside that, I didn't need 3 cups of coffee to wake up in the morning. One was sufficient. Thanks so much.

Monique Lair - San Rafael, CA 94901

MULTIPLE SCLEROSIS

Aloha and many thanks to for telling my friend Dorothy about the 'Extra Energy Enzymes'. As you know, Dorothy, a 46 year-old woman has had Multiple Sclerosis for 15 years and is a quadriplegic. I have been assisting her for the past month and have seen her both before her starting the enzymes and after her having been on them for three weeks. Dorothy reports the following improvements: 1) For years she has been on steroids to reduce muscle spasms. From time to time she goes off them but (until starting with the enzymes) could never be off the steroids for more than a week at a time. Shortly after starting the enzymes, however, she went off the steroids and has been able to stay off them for three weeks without any increase in her muscle spasms. She has never been able to do this before. 2) Her energy has increased substantially. From her very first day on the enzymes she was able to exercise (mostly from the neck up) in her swimming pool much more vigorously and for a longer periods of time. 3) Her speech has become less slurred. 4) For the past three days she has reported improvement in her eyesight. 5) And I have observed that her general mood and outlook on life have improved remarkably.

PROGRESS REPORT: FIVE MONTHS FOLLOW-UP

This is to give you a progress report concerning Dorothy of San Diego. Since my last letter reporting several favorable changes as a result of using the enzymes, Dorothy reports the following improvements:

- 1) "I am doing much better."
- 2) "I am able to see more clearly."

Extra Energy Enzymes

- 3) "I can move my arms more."
- 4) "I am more limber."
- 5) "My appetite is better."
- 6) "My muscle spasms have been reduced 75%."

I wish to add that Dorothy has now been off steroids for approximately 5 months. Before using the enzymes, she was never able to be off steroids for more than a week at a time.

*Tom F. Silverson – San Diego, CA 92109
Consultant in Ecological Medicine*

EXTRA ENERGY ENZYMES - ENERGY

I recently purchased your product 'Extra Energy Enzymes' while browsing through my local health food store. I'm actually involved in regular workouts and bicycling and was looking for a better way to increase my energy level which drops as the day wears on. After reading the little I have on 'Free Radicals', I was looking for a cleansing program and came across your product.

I have been using these enzymes for a month now and have felt more 'Lasting' energy as the days go on and just more energy overall while working out. I am writing to tell you about my excitement with your product and am continuing to feel just great!

Robin Watson - Corte Madera, CA 94925

EXTRA ENERGY ENZYMES - ARTHRITIC KNEE

My husband had a very painful, sore and swollen knee. Diagnosis: Arthritic flare-up with inflamed tendons. This condition gradually worsened over a period of several months. He slept on his back, and pressure on the knee was extremely painful. He also slept with a hot water bottle between his knees.

After several months of suffering and gradual worsening, the doctor (M.D.) gave him Ibuprofen, 400 mg. 6 per day. This had absolutely no effect on the pain or swelling.

Also, since taking a vasodilator for high blood pressure, in November of 1985, his legs and ankles were swelling badly, and the Ibuprofen made this worse. The swelling in his legs and ankles had worsened to the point that it was difficult to go anywhere for a long period of time as he needed to lie down to relieve the swelling.

January 31, 1987, we arrived at Desert Hot Springs, CA. We have been spending 2 months there each winter and have become well acquainted with the people at Adam's Healthway. My husband asked at Adam's Healthway what they had for his sore knee. They said they had a new product and have had phenomenal success with it and handed him a bottle of 'Extra Energy Enzymes' to try, saying this will help.

My husband started taking six a day according to the directions on the bottle. Within a week, I noticed he was walking better and not mentioning the pain so often. He continued taking 'Extra Energy' as directed. Not only did his knee improve, the swelling and pain are gone and there is only a slight residual soreness.

Also, another interesting aspect of this story is the fact that the swelling in his legs and ankles that had plagued him since taking the vasodilator in November of 1985, has all but disappeared since starting 'Extra Energy Enzymes'. One other interesting result from taking "Extra Energy" is that appears to have had a positive effect on his high blood pressure, as it is lower that it has been in many years. He is on less medication and I'm hoping he can get off all of it.

Frank and Dolores Martenson - Beaverton, Or. 97007

EXTRA ENERGY ENZYMES - ARTHRITIS

I just want to tell you how pleased I am with your product 'Extra Energy Enzymes'. I have been taking medication off an on for a number of years for arthritis. When I was in the Sun Harvest store, one of the clerks handed me your sample. I was about to renew my prescription, but after I reading about your enzymes, I decided to give it a try. To my surprise, at the end of the 2 weeks treatment of 6 pills a day, the soreness was leaving just as it had with the

medication.

Because there are no side effects with a whole food product, I do not hesitate the hand out your one of your pamphlets and to suggest it might help. Those who have tried it say there is definite improvement.

Mrs. Olive J. Martin - San Antonio, TX 78201

EXTRA ENERGY ENZYMES - BETTER ENERGY AND SKIN

I have used you product 'Extra Energy Enzymes' with excellent results. I've always been low in energy in the past, but now I have plenty! My skin looks terrific (very clear with good color) plus I can now extend my head backwards without any pain in my neck area.

L. La Plain - Hoboken, NJ 07030

EXTRA ENERGY ENZYMES - MELANOMA

April 28, 1986 Seattle doctors told my sister Evelyn that her melanoma cancer was back, there was no cure and nothing more could be done. They said the cancer had already spread to here lungs and liver. May 7th; we brought her home.

A black net grew just under the skin in all directions from the rash on her groin and left leg. The rash then became ulcers that oozed a bloody serum.

May 17th; a naturopath doctor, a friend, sold her a bottle of 'Extra Energy Enzymes' which he had just bought from a salesman. The doctor said, "Try it, you never know.. Take eight tablets a day."

In four days her eyes were clearer and her appetite improved. She became more alert and cheerful and the black net seemed to be receding. The redness diminished from the rash and the ulcers began to dry up. Every day for eleven days she improved and we felt so encouraged. Then we ran out of the 'Extra Energy Enzymes' and in four days time her leg swelled so much I couldn't get her into the car and we had to have an ambulance take her back to the hospital on May 31st.

By the time the doctor ran down the salesman, six more days went by before he got her the another bottle. By then, she could no longer swallow pills anymore. She passed away on June 21st., 1986.

I guess it's too much to suppose that the increased SOD levels would have helped her body cure itself. I only know that the 'Extra Energy Enzymes' caused her no pain (in fact, she had less pain during those eleven days) and she felt and looked better – Things Chemotherapy can't claim. I just wish we could have had it sooner and continued to use it without interruption. It's not anyone's fault. The salesman didn't know the doctor had sold it and needed more so soon.

I read about how increased SOD levels in a book called "Life Extensions" and now I take your 'Extra Energy Enzymes' everyday and encourage all my family and friends to take it and to eat fresh vegetables and fruits regularly.

Mrs. Mariellen Capurro - Fallon, NV

ANTI-STRESS ENZYMES - ENERGY - SINUS HEADACHES

To whom it may concern:

I am a healthy 42 year old male. Approximately three months ago I began taking 'Anti-Stress Enzymes' purchased at the Vibrant Health store in San Rafael, Ca.

I wanted to try something that would possibly give me more energy. I am a property manager and also have my own construction company and both of these jobs can create allot of stress. I noticed I was getting too tired too often.

After three months of taking the taking 'Anti-Stress Enzymes' I have noticed a marked improvement in the level of energy I seem to have not only during the day but at night as well. I no longer have to drag myself home in the evening. Also, I have noticed a great improvement in my sinus headaches. I noted that they are spaced further

apart and seem to be less intense than before taking your Anti-Stress tablets.

I highly recommend these enzymes for anyone who is in a high stress position or who always seems to lack energy.

Joseph M. Caggiano - San Rafael, Ca. 94901
